EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows in order to provide proper antecedent basis for all of the limitations in new independent claim 21:

In claim 21, in the third line of step "(g)", replace "advertising" with -- parameter --.

In claims 12, 14 and 19, change "©" to -- (c) --.

Double Patenting

The double patenting rejection set forth in the Office action mailed 7 May 2004 is withdrawn because the allowed claims are substantially different from the allowed claims in copending application 09/872,072.

Allowable Subject Matter

Claims 2-14 and 17-21 are allowed.

The following is an examiner's statement of reasons for allowance: In combination with the claimed subject matter, the prior art does not teach or fairly suggest forming associations between a first set of images and sub-areas of a banner, maintaining those association during the display of a serving of initial signals, altering the associations according to optimized parameter information in order to provide a second set of associations and images, maintaining the second

set of associations during the display of a second serving of signals, and repeating these steps.

The closest prior art, U.S. Patent No. 6,370,537 (Gilbert et al), teaches associating a rotating image with a region of the display and fails to address the aforementioned limitations as they appear in new independent claim 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
